DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-2, 4-9 and 16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. First, what is a micromixer? After reading the specification, the definition is still elusive. Furthermore, I am not sure how a standard mixer differs from a micromixer.

4. Also, in claims 2 and 4-9, the Applicants use the term "preferably." Description of the examples or preferences is properly set forth in the specification rather than the claims. If stated in the claims examples and preferences lead to confusion over the intended scope of a claim. Therefore, each

Art Unit: 1713

occurrence of "preferably" and the limitations pertaining to what is preferable must be deleted.

5. Claim 14 is not written in a proper Markush format. The claims express alternative limitation and should be written in a proper Markush format. Alternative expressions are permitted if they present no uncertainty or ambiguity with respect to the question of scope or clarity of the claims. One acceptable form of alternative expression, which is commonly referred to as a Markush group, recites members as being "selected from the group consisting of A, B and C" or wherein the group is A, B or C. See Ex parte Markush, 1925 C.D. 126 (Comm'r Pat. 1925). It is improper to use the term "comprising" instead of "consisting of." See Ex parte Dotter, 12 USPQ 382 (Bd. App. 1931). It is suggested that the Applicant not use "comprising" and "and/or" and adopt a standard Markush format. See MPEP 2173.05(h).

Allowable Subject Matter

6. The claims would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Art Unit: 1713

7. The following is an examiner's statement of reasons for allowance: The closest prior art located or identified by the Examiner is Ekholm et al., U.S. Patent No. 6,241,852 (hereinafter "Ekholm") and Schneider, U.S. Patent No. 4,805,154. Ekholm and Schneider each discloses mixers from mixing fluids comprising inlets and outlets, stator shells and rotors and blades. Ekholm and Schneider differs from the present invention in that the present invention requires blades (3) distributed in blade groups (3a-3g) being arranged around shaft in the same plane perpendicular to the longitudinal axis of the shaft. The blade configuration of the present invention is novel.

8. As of the date of this non-final office action, the Examiner has not located or identified any reference that can be used singularly or in combination with another reference including Ekholm and Schneider to render the present invention anticipated or obvious to one of ordinary skill in the art.

9. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
